

SINDHU KOTESWARI P

8867832456| psindhu1426@gmail.com | Bangalore, Karnataka

CAREER OBJECTIVE

B.Tech in Electronics and Communication Engineering student with a strong foundation in Embedded Systems, Microcontrollers, IoT, Communication Protocols (UART, SPI, I2C), PCB Design, and Electronics. A curious learner with a passion for understanding technology and solving real-world engineering problems. Seeking opportunities to gain practical industry experience, enhance my technical expertise, and contribute effectively to innovative projects while continuously learning and growing as an engineer.

EDUCATION

B Tech in Electronics and communication	2023 - present
CGPA : 8.5 / 10 Reva University, Bangalore	
PUC	2023
Percentage : 94.6 % Mahadev PU college, Bangalore	
SSLC	2021
Percentage : 93.1 % Great International School, Bangalore	

SKILLS

Embedded systems: Embedded C, RTOS, STM32
Communication protocols: UART, I2C, SPI
Tools and Platforms: Git, VS Code, STM32CubeIDE, Kicad , Arduino IDE
Sof Skills: Curious learner, Adaptability, Communicaton, Team Collaboration, Active Listening

ACADEMIC PROJECTS

- 1. Autonomous Smart Agriculture Rover**
 - Developed FreeRTOS - based autonomous agriculture rover using STM32F103C8T6 for real-time monitoring of soil moisture, temperature, humidity, light intensity, and obstacle detection.
 - Implemented an automated irrigation system using soil moisture sensing and relay - controlled water pumping, enabling intelligent water management for precision agriculture
 - Integrated ESP32-based IoT Communication, GPS tracking, GSM alerts, and Bluetooth control for remote monitoring, location tracking, and wireless rover operation
- 2. Smart Home Automation PCB Design**
 - Designed a custom IoT-enabled PCB using the ESP8266 microcontroller to remotely control four AC loads through Wi-Fi connectivity and relay-based switching.
 - Implemented real-time current, voltage, and power monitoring using the INA219 sensor, allowing energy usage tracking and load status monitoring.
 - Developed a reliable power and control architecture incorporating AC-DC conversion, voltage regulation, relay driver circuits, protection mechanisms, and UART-based programming interfaces.

CERTIFICATIONS

- Mastering Embedded systems with C and STM32, Udemy.
- PCB Design using Industry-Standard Tools, Enthutech.
- Embedded system Course, Simplilearn.
- FreeRTOS Simplified, Microchip University.

EXTRACURRICULAR ACTIVITIES

- Design and Content Team member, DevBraze Club .
- NSS Volunteer, National Service Scheme.
